

# JOIN B.C.'S NEW MEDICAL SCHOOL

## OPPORTUNITY PROFILE

### Senior Director, Technical Operations and Facilities

#### OVERVIEW

At the medical school at SFU, we are committed to shaping the future of healthcare through innovative education, ground-breaking research, and community engagement. As we embark on this journey to redefine medical education, we are seeking passionate individuals who are eager to contribute to our mission.

We envision a medical education system where students and residents learn as part of a team in primary care, community-level settings and patient-centred environments. Our curriculum considers social, environmental and prevention contexts while seeking to advance reconciliation by embedding and equalizing Indigenous knowledge systems in our learning, research and practices. As we work towards establishing the school in Surrey, B.C., we will foster our growing relationships with the local community, Fraser Health, First Nations Health Authority, physicians and Indigenous partners who will help us meet the diverse health needs of the communities we serve. We seek to improve access to primary care throughout the province while resting on a solid foundation of high-quality, accredited education and world-class research efforts that keep us oriented toward measurable and socially accountable outcomes.

The Senior Director, Technical Operations and Facilities is responsible for providing strategic leadership and oversight for the technical operations of the medical school, ensuring the successful provision of services for facilities, information technology, technical operations, and safety & risk services on-campus, as well as distributed sites across the province. In addition, the Senior Director will provide leadership in the development and delivery of capital renovation projects. As one of the first executive team members for the medical school, this role will be influential in establishing and operationalizing the technical and facilities operations in support of the strategic vision and direction, establishing key operational policies and procedures, developing strategic relationships with external partners, and building a management team capable of driving growth and fostering innovation.

The ideal candidate is a forward-thinking, strategic leader with a passion for operational, technical and facilities operations excellence. They have a successful and extensive track record in the healthcare or post-secondary education environment leading multidisciplinary teams within the area of technical operations. To that end, they possess a unique skill for translating high-level, overarching missions into actionable and operational strategies, and mobilizing people and resources in order to achieve objectives. They are a natural collaborator, maintaining effective partnerships and pursuing new connections with shared interests and goals.

## QUALIFICATIONS

The successful candidate will have:

- A Master's degree in Science or Business Administration.
- Over 10 years of related strategic or senior leadership experience in large, multi-site, academic or health services organizations with a recent focus on the development, implementation and evaluation of operational and strategic plans.
- Progressively senior experience within a large organization with expertise in facilities development within current municipal, provincial and national standards, codes, bylaws and regulations applicable to health care.
- Demonstrated ability to translate complex conceptual ideas into operational deliverables and lead within a complex academic environment, including balancing academic and operational priorities.
- Strong strategic planning and project management skills with the ability to effectively facilitate to achieve outcomes.
- Excellent interpersonal and communication skills. Excellent leadership, consultation, facilitation, consensus building, conflict resolution, negotiation and team-building skills.

An equivalent combination of education, training, and experience may be considered.
